

Amendment to the Specification

Please replace paragraph [0091] of the published application (at page 16 of the application as filed) with the following rewritten paragraph:

[0091] The peptides of the invention may be introduced into cells by the use of a viral vector. The use of vaccinia vector for this purpose is detailed in Chapter 16 of the above-noted Current Protocols in Molecular Biology. The use of Adenovirus vectors has been described [Teoh et al. (1998) Blood 92, 4591-4601; Narumi et al. (1998) ~~Am. J. Respir. Cell. Mol. Biol.~~ 19, 936-941; Pederson et al. (1998) J. Gastrointest. Surg. 2, 283-91; Guang-Lin et al. (1998) Transplant. Proc. 30, 2923-4; Nishida et al. (1998) Spine 23, 2437-42; Schwarzenberger et al. (1998) J. Immunol. 161, 6383-9; Cao et al. (1998) J. Immunol. 161, 6238-44]. Retroviral transfer of antisense sequences has been described [Daniel et al. (1998) J. Biomed. Sci. 5, 383-94].
